

MotoAmerica Technical bulletin

07-5000-24 SuperSport Data Logger

To all teams and competitors,

Any team running in the top 6 in the MotoAmerica Supersport championship point standings and running under a non-Superport next-generation platform is required to add the 2D logger with the 2D high precision GPS for the purpose of data collection. The logged data must be configured, formatted, and functioning in the 2D analysis platform; raw data is not considered acceptable for data collection purposes.

The 2D logger and GPS will be required before the event begins at Mid-Ohio [2024 Mid-Ohio | MotoAmerica Registration](#). Failure to comply with this rule may result in disqualification from the event and/or further penalties as determined by AMA.
